

RANGE OF SERVICES

The Termimesh product was developed in 1990 and since that time has attracted worldwide support for its unique, effective and environmentally friendly termite control methods with outlets operating in Hawaii, Florida, Texas, Japan, Singapore, Vietnam and France.

Since its introduction, the Termimesh System has consistently received the highest level of government approval, involving the most stringent accreditations and evaluations available in Australia and elsewhere in the world. It has proven itself as a highly effective termite barrier and is the first choice amongst many of Australia's leading builders, architects and designers. The system has been installed in more than 400,000 homes world-wide.

The Termimesh Network has always focussed on providing products and services that "make sense". These high values of quality and satisfaction have been incorporated into an expanded range of product offerings for both home and commercial use. We are proud to be able to offer the following range of products and services.

Termimesh System is the only stainless steel mesh termite barrier and continues to set the industry standard. An ultra-marine grade stainless steel mesh creates an impenetrable physical barrier that termites cannot eat or destroy. Good for you, good for the planet and good for your home. Now supported by the Pledge Guarantee, as unique as Termimesh.

Termimesh Pest Management will now operate as Termitrust – Pest Control Experts. This new name reflects our commitment to providing pest control services, for all types of pests, which are effective and can be trusted. We have a proven track record in providing affordable pest control for established homes and commercial premises.

Our Termidry range of waterproofing products for new construction is consistent with the high levels of quality and service that we provide with our entire range of products. We deliver a complete waterproofing service for residential housing and commercial construction. Termidry delivers the highest standard workmanship at competitive rates.

Perfect for any setting, whether that means a safe play space for children or simply entertaining in style with family and friends, Termiturf synthetic grass will always be ready without watering, mowing or trimming. With a range of exciting styles available, we are confident we have an artificial lawn to suit your requirements.
